Kill Phil was a revolutionary poker manual -- its simplified yet potent strategies empowered even rank novices to compete against the world's best poker players.

**Kill Everyone** begins where Kill Phil left off. Its perfect blend of real-time experience, poker math, and computational horsepower combine to create new concepts and advanced strategies never before seen in print for multi-table tournaments, Sit-n-Go's, and satellites.

**Kill Everyone** explains how to choose the right strategy for the right game, provides the proper tactics, and introduces new weapons into a tournament-poker-player's arsenal. These include:

- \* fear and fold equity
- \*equilibrium plays
- bubble factors
- endgame strategies
- optimal heads-up play
- and much much more!

Unlike Kill Phil, which was 90% pre-flop strategy, **Kill Everyone** goes all the way. In the end, you'll know how to accumulate chips early, navigate through the middle stages, and perfect your play on the bubble and at the final table.

This book is for anyone serious about playing tournament poker, both live and online. And for cash-game players, a bonus chapter, penned by online cash-game ace and 2007 WSOP bracelet winner Mark Vos, helps you develop your short-handed no-limit hold 'em cash game.
