Riccardo Caponetto, Giovanni Dongola, Luigi Fortuna, Ivo Petras

Fractional Order Systems: Modeling and Control Applications (World Scientific Series on Nonlinear Science Series A) (World Scientific Series in Nonlinear Science, Series a) Riccardo Caponetto, Giovanni Dongola, Luigi Fortuna, Ivo Petras

This book aims to propose the implementation and application of Fractional Order Systems (FOS). It is well known that FOS can be utilized in control applications and systems modeling, and their effectiveness has been proven in many theoretical works and simulation routines. A further and mandatory step for FOS real world utilization is their hardware implementation and applications on real systems modeling. With this viewpoint, introductory chapters are included on the definition of stability region of Fractional Order PID Controller and Chaotic FOS, followed by the practical implementation based on Microcontroller, Field Programmable Gate Array, Field Programmable Analog Array and Switched Capacitor. Another section is dedicated to FO modeling of Ionic Polymeric Metal Composite (IPMC). This new material will have applications in robotics, aerospace and biomedicine.

From reader reviews:

Eileen Smith:

Have you spare time for any day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a go walking, shopping, or went to the actual Mall. How about open as well as read a book eligible Fractional Order Systems: Modeling and Control Applications (World Scientific Series on Nonlinear Science Series A) (World Scientific Series in Nonlinear Science, Series a)? Maybe it is to become best activity for you. You realize beside you can spend your time using your favorite's book, you can smarter than before. Do you agree with its opinion or you have some other opinion?

Cecil Andrade:

The actual book Fractional Order Systems: Modeling and Control Applications (World Scientific Series on Nonlinear Science Series A) (World Scientific Series in Nonlinear Science, Series a) has a lot of information on it. So when you check out this book you can get a lot of help. The book was compiled by the very famous author. The writer makes some research just before write this book. That book very easy to read you may get the point easily after perusing this book.

John Lyons:

Reading a book to be new life style in this calendar year; every people loves to go through a book. When you go through a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, because book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your analysis, you can read education books, but if you act like you want to entertain yourself read a fiction books, these kinds of us novel, comics, along with soon. The Fractional Order Systems: Modeling and Control Applications (World Scientific Series on Nonlinear Science Series A) (World Scientific Series in Nonlinear Science, Series a) provide you with a new experience in looking at a book.

Marilyn Urquhart:

As a scholar exactly feel bored to reading. If their teacher requested them to go to the library as well as to make summary for some publication, they are complained. Just minor students that has reading's soul or real their interest. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading seriously. Any students feel that reading is not important, boring along with can't see colorful images on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Fractional Order Systems: Modeling and Control Applications (World Scientific Series on Nonlinear Science Series A) (World Scientific Series in Nonlinear Science, Series a) can make you

sense more interested to read.
