Clinical Supervision: Legal, Ethical, and Risk Management Issues Dr George B Haarman Psy.D.

Clinical Supervision: Legal, Ethical, and Risk Management Issues - Clinical supervision is an increasingly important area in mental health, medicine and the helping professions in general. Formal professional classroom instruction in mental health and social services is typically followed by mandatory hours or even years of supervised clinical placements and, in some cases, even post licensure. It is typically under the tutelage and supervision of an experienced practitioner that professionals, regardless of their discipline, learn the skills necessary to become competent, ethical and effective members of the helping professions. Clinical Supervision will attempt to identify and review many of the common problems and challenges of clinical supervision that occur in mental health and social service settings. Ethical, legal and risk-management issues will be identified and reviewed, along with potential solutions. The roles and responsibilities of the supervisor and supervisee will be examined and techniques to define goals and objectives of supervision reviewed. Common difficulties and specific problem situations that may occur in supervision are reviewed and discussed. This book assists in making distinctions between administrative and clinical supervision, areas of potential overlap or conflict, and potential difficulties with boundary issues. Specific supervisor competencies and the qualities and characteristics of effective supervisors will be reviewed. Clinical Supervision: Legal, Ethical, and Risk Management Issues is a must for any mental health and social service professional with staff reporting to them.
