Problems for General Chemistry and Qualitative Analysis C. J. Nyman, G. B. King, J. A. Weyh

A thorough revision of this successful problem book, providing a clear, concise, and careful presentation of simple and direct methods for solving numerical problems that illustrate chemical principles . . . using dimensional analysis throughout and including numerous worked examples. Strict adherence to significant figures is observed in numerical solutions; problems are presented with difficulty levels ranging from straightforward to challenging--with answers to all numerical problems found in an appendix. Also introduces SI units.
