Satellite Communications Systems Engineering: Atmospheric Effects, Satellite Link Design and System Performance

Louis J. Ippolito Jr.

Satellite Communications Systems Engineering: Atmospheric Effects, Satellite Link Design and System Performance Louis J. Ippolito Jr.

Provides an invaluable, detailed and up-to-date coverage of atmospheric effects and their impact on satellite communications systems design and performance.

Significant progress has been made in the last decade in the understanding and modelling of propagation effects on radio wave propagation in the bands utilized for satellite communications. This book provides a comprehensive description and analysis of all atmospheric effects of concern for today's satellite systems, and the tools necessary to design the links and to evaluate system performance.

This book will serve as an excellent reference to communications engineers, wireless network and system engineers, system designers and graduate students in satellite communications and related areas.

Key features:

- Provides the state of the art in communications satellite link design and performance from the practicing engineer perspective – concise descriptions, specific procedures and comprehensive solutions
- Contains the calculations and tools necessary for evaluating system performance
- Provides a complete evaluation of atmospheric effects, modelling and prediction
- Focuses on the satellite free-space link as the primary element in the design and performance for satellite communications, and recognizes the importance of free-space considerations such as atmospheric effects, frequency of operation and adaptive mitigation techniques
- a solutions manual is available directly from the author (lippolit@gwu.edu)

From reader reviews:

Macie Tiffany:

Book is usually written, printed, or highlighted for everything. You can understand everything you want by a e-book. Book has a different type. As you may know that book is important factor to bring us around the world. Beside that you can your reading proficiency was fluently. A book Satellite Communications Systems Engineering: Atmospheric Effects, Satellite Link Design and System Performance will make you to possibly be smarter. You can feel more confidence if you can know about every thing. But some of you think that will open or reading any book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you seeking best book or acceptable book with you?

Tara Smith:

Spent a free time to be fun activity to do! A lot of people spent their sparetime with their family, or their own friends. Usually they carrying out activity like watching television, about to beach, or picnic within the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Could be reading a book may be option to fill your free time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the reserve untitled Satellite Communications Systems Engineering: Atmospheric Effects, Satellite Link Design and System Performance can be good book to read. May be it may be best activity to you.

Joseph Carter:

Do you have something that you enjoy such as book? The reserve lovers usually prefer to select book like comic, quick story and the biggest the first is novel. Now, why not hoping Satellite Communications Systems Engineering: Atmospheric Effects, Satellite Link Design and System Performance that give your entertainment preference will be satisfied by simply reading this book. Reading behavior all over the world can be said as the opportunity for people to know world considerably better then how they react towards the world. It can't be explained constantly that reading habit only for the geeky man or woman but for all of you who wants to end up being success person. So , for every you who want to start studying as your good habit, you are able to pick Satellite Communications Systems Engineering: Atmospheric Effects, Satellite Link Design and System Performance become your own starter.

Sherry Fitzgerald:

That book can make you to feel relax. That book Satellite Communications Systems Engineering: Atmospheric Effects, Satellite Link Design and System Performance was colourful and of course has pictures around. As we know that book Satellite Communications Systems Engineering: Atmospheric Effects, Satellite Link Design and System Performance has many kinds or genre. Start from kids until teens. For example Naruto or Investigation company Conan you can read and think that you are the character on there. So , not at all of book usually are make you bored, any it makes you feel happy, fun and chill out. Try

to choose the best book for you personally and try to like reading which.
