J. M. Plotkin

Hausdorff on Ordered Sets (History of Mathematics,) (History of Mathematics; Sources) J. M. Plotkin
Georg Cantor, the founder of set theory, published his last paper on sets in 1897. In 1900, David Hilbert made Cantor's Continuum Problem and the challenge of well-ordering the real numbers the first problem of his famous lecture at the international congress in Paris. Thus, as the nineteenth century came to a close and the twentieth century began, Cantor's work was finally receiving its due and Hilbert had made one of Cantor's most important conjectures his number one problem. It was time for the second generation of Cantorians to emerge. Foremost among this group were Ernst Zermelo and Felix Hausdorff. Zermelo isolated the Choice Principle, proved that every set could be well-ordered, and axiomatized the concept of set. He became the father of abstract set theory. Hausdorff eschewed foundations and developed set theory as a branch of mathematics worthy of study in its own right, capable of supporting both general topology and measure theory. He is recognized as the era's leading Cantorian. Hausdorff published seven articles in set theory during the period 1901-1909, mostly about ordered sets. This volume contains translations of these papers with accompanying introductory essays. They are highly accessible, historically significant works, important not only for set theory, but also for model theory, analysis and algebra. This book is suitable for graduate students and researchers interested in set theory and the history of mathematics.

From reader reviews:

Ruth Powers:

Reading a e-book can be one of a lot of action that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new information. When you read a book you will get new information due to the fact book is one of a number of ways to share the information as well as their idea. Second, reading a book will make anyone more imaginative. When you examining a book especially fiction book the author will bring someone to imagine the story how the characters do it anything. Third, you are able to share your knowledge to other individuals. When you read this Hausdorff on Ordered Sets (History of Mathematics,) (History of Mathematics; Sources), it is possible to tells your family, friends and soon about yours reserve. Your knowledge can inspire others, make them reading a book.

Carl Brinkley:

Reading can called mind hangout, why? Because when you are reading a book specially book entitled Hausdorff on Ordered Sets (History of Mathematics,) (History of Mathematics; Sources) your head will drift away trough every dimension, wandering in each and every aspect that maybe unidentified for but surely can become your mind friends. Imaging just about every word written in a book then become one application form conclusion and explanation which maybe you never get before. The Hausdorff on Ordered Sets (History of Mathematics,) (History of Mathematics; Sources) giving you one more experience more than blown away your mind but also giving you useful info for your better life in this era. So now let us show you the relaxing pattern this is your body and mind are going to be pleased when you are finished looking at it, like winning an activity. Do you want to try this extraordinary spending spare time activity?

Jeffrey Price:

You could spend your free time to learn this book this book. This Hausdorff on Ordered Sets (History of Mathematics,) (History of Mathematics; Sources) is simple to develop you can read it in the recreation area, in the beach, train and also soon. If you did not have got much space to bring the actual printed book, you can buy the actual e-book. It is make you simpler to read it. You can save the actual book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

Carmen Bell:

What is your hobby? Have you heard this question when you got learners? We believe that that concern was given by teacher for their students. Many kinds of hobby, Every person has different hobby. And also you know that little person such as reading or as reading become their hobby. You have to know that reading is very important and book as to be the matter. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You will find good news or update with regards to something by book. A substantial number of sorts of books that can you choose to use be your object. One of them is actually
