Advances and Technical Standards in Neurosurgery S. Mingrino, B. Pertuiset, L. Symon, H. Troupp, M. G. Ya?argil, H. Krayenbühl, F. Loew, V. Logue, J. Brihaye

There are two important reasons for publishing this new series entitled "Advances and Technical Standards in Neurosurgery": 1. the lack of any organized common European postgraduate training system for young neurosurgeons and 2. the language barriers, which impede the exchange of neurosurgical findings in Europe more than in other parts of the world. The fact that the English language is well on the way to becoming the international medium at European scientific conferences is a great asset in terms of mutual understanding. Therefore the Editors have decided to publish all contributions in English, regardless of the native language of the authors. All contributions are submitted to the entire editorial board before publication of any volume. Our series is not intended to compete with the publications of original scientific papers in other neurosurgical journals. Our intention is, rather, to present fields of neurosurgery and related areas in which important recent advances have been made. The contributions are written by specialists in the given fields and constitute the first part of each volume. In the second part of each volume, we publish detailed descriptions of standard operative procedures, furnished by experienced clinicians; in these articles the authors describe the techniques they employ and explain the advantages, difficulties and risks involved in the various procedures. This part is intended primarily to assist young neurosurgeons in their postgraduate training. However, we are convinced that it will also be useful to experienced, fully trained neurosurgeons.

From reader reviews:

Curtis Russell:

What do you regarding book? It is not important along with you? Or just adding material if you want something to explain what yours problem? How about your free time? Or are you busy person? If you don't have spare time to complete others business, it is make you feel bored faster. And you have free time? What did you do? Every individual has many questions above. The doctor has to answer that question mainly because just their can do that will. It said that about guide. Book is familiar on every person. Yes, it is right. Because start from on guardería until university need this specific Advances and Technical Standards in Neurosurgery to read.

Maureen Guzman:

The e-book with title Advances and Technical Standards in Neurosurgery contains a lot of information that you can understand it. You can get a lot of advantage after read this book. This specific book exist new information the information that exist in this reserve represented the condition of the world at this point. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you within new era of the glowbal growth. You can read the e-book on the smart phone, so you can read the idea anywhere you want.

Earl Sanders:

Playing with family in a very park, coming to see the marine world or hanging out with friends is thing that usually you might have done when you have spare time, then why you don't try matter that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Advances and Technical Standards in Neurosurgery, it is possible to enjoy both. It is great combination right, you still desire to miss it? What kind of hang type is it? Oh occur its mind hangout fellas. What? Still don't get it, oh come on its identified as reading friends.

Agatha Roughton:

As we know that book is important thing to add our understanding for everything. By a book we can know everything we would like. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This reserve Advances and Technical Standards in Neurosurgery was filled with regards to science. Spend your free time to add your knowledge about your technology competence. Some people has distinct feel when they reading a new book. If you know how big good thing about a book, you can experience enjoy to read a reserve. In the modern era like currently, many ways to get book that you just wanted.
