Life at the Limits: Organisms in Extreme Environments

David A. Wharton

ocean depths, salt lakes, soda lakes, and estuarine muds, among other environments. Life at the Limits considers how organisms survive major stresses, and what extreme organisms can tell us about the origin of life and the possibilities of extraterrestrial life. David Wharton is a Senior Lecturer in Zoology at the University of Otago in Dunedin, New Zealand. He has focused his research on the survival abilities of nematodes, resulting in the publication of over 75 research papers and one book, The Functional Biology of Nematodes (Croom Helm, 1986). His contribution to research was recognized by the award of the degree Doctor of Science by the University of Bristol in 1997. Recently, Wharton has become interested in the popularization of science through his involvement in the establishment of a Postgraduate Diploma in Natural History, Filmmaking and Communication, a collaboration between the University of Otago and Natural History New Zealand, a producer of natural history films based in Dunedin.
