A Primer on Mapping Class Groups (PMS-49) (Princeton Mathematical Series) Benson Farb, Dan Margalit

The study of the mapping class group Mod(S) is a classical topic that is experiencing a renaissance. It lies at the juncture of geometry, topology, and group theory. This book explains as many important theorems, examples, and techniques as possible, quickly and directly, while at the same time giving full details and keeping the text nearly self-contained. The book is suitable for graduate students.

A Primer on Mapping Class Groups begins by explaining the main group-theoretical properties of Mod(S), from finite generation by Dehn twists and low-dimensional homology to the Dehn-Nielsen-Baer theorem. Along the way, central objects and tools are introduced, such as the Birman exact sequence, the complex of curves, the braid group, the symplectic representation, and the Torelli group. The book then introduces Teichmüller space and its geometry, and uses the action of Mod(S) on it to prove the Nielsen-Thurston classification of surface homeomorphisms. Topics include the topology of the moduli space of Riemann surfaces, the connection with surface bundles, pseudo-Anosov theory, and Thurston's approach to the classification.

From reader reviews:

Richard McCain:

This A Primer on Mapping Class Groups (PMS-49) (Princeton Mathematical Series) tend to be reliable for you who want to certainly be a successful person, why. The explanation of this A Primer on Mapping Class Groups (PMS-49) (Princeton Mathematical Series) can be on the list of great books you must have will be giving you more than just simple looking at food but feed a person with information that possibly will shock your previous knowledge. This book is actually handy, you can bring it all over the place and whenever your conditions both in e-book and printed versions. Beside that this A Primer on Mapping Class Groups (PMS-49) (Princeton Mathematical Series) forcing you to have an enormous of experience for instance rich vocabulary, giving you trial run of critical thinking that could it useful in your day exercise. So , let's have it and revel in reading.

Gregory Stclair:

A lot of people always spent all their free time to vacation as well as go to the outside with them household or their friend. Did you know? Many a lot of people spent these people free time just watching TV, or maybe playing video games all day long. If you would like try to find a new activity this is look different you can read any book. It is really fun for you personally. If you enjoy the book that you just read you can spent all day every day to reading a e-book. The book A Primer on Mapping Class Groups (PMS-49) (Princeton Mathematical Series) it is quite good to read. There are a lot of those who recommended this book. These were enjoying reading this book. In case you did not have enough space to create this book you can buy the particular e-book. You can m0ore quickly to read this book from the smart phone. The price is not too expensive but this book offers high quality.

Sarah Brumfield:

Reading a book to become new life style in this 12 months; every people loves to examine a book. When you read a book you can get a lot of benefit. When you read publications, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these us novel, comics, along with soon. The A Primer on Mapping Class Groups (PMS-49) (Princeton Mathematical Series) will give you new experience in reading a book.

Sherry Holsey:

A lot of book has printed but it differs. You can get it by internet on social media. You can choose the very best book for you, science, comedian, novel, or whatever by means of searching from it. It is known as of book A Primer on Mapping Class Groups (PMS-49) (Princeton Mathematical Series). You can include your knowledge by it. Without departing the printed book, it might add your knowledge and make an individual

happier to read. It is most significant that, you must aware about publication. It can bring you from one location to other place.
