# Register Variation in Indian English (Studies in Corpus Linguistics)

*Chandrika Balasubramanian*

**Register Variation in Indian English (Studies in Corpus Linguistics)** Chandrika Balasubramanian  
*Register Variation in Indian English* constitutes the first large-scale empirical investigation of an international variety of English. Using a combination of the corpus compiled for this project and relevant sections of ICE-India as its database, this work tests existing descriptions and characterizations of English in India, and provides the first empirical account of register variation in Indian English (or indeed, any international variety of English). Included in this survey are linguistic features that have been examined before and others that have not. From an empirical standpoint, it comments on the process of Indianization of the English used in India. The book will be of interest to readers beyond specialists of Indian English as it is one of very few studies to undertake a large-scale corpus analysis for the purpose of dialect research. The book provides a model on which future studies of international Englishes can be based.
