This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 edition. Excerpt: ...coil will be much more rapid than when the surrounding water becomes warmer. The average temperature of the water during the 10-hour period is 60; but the water leaving the pipe and in contact with the upper half of its surface is at a considerably higher temperature than the main body of water in the tank; therefore, with natural circulation, it is well to make ample allowance for the effect of this skin of warm water surrounding the steam coils, and to assume that they will not give off more than  $\frac{1}{8}$  as much heat as that corresponding to the difference in temperature between the steam and the water in the tank, based on 100 heat units per degree difference as stated above. In other words, allow only 66 $\frac{2}{3}$ --or, in round numbers, 70--heat units per hour per degree difference in temperature between the steam and the water in the tank. If the difference in temperature is  $230-70 = 160$ , on the basis stated, one square foot of coil would give off  $70 \times 160 = 11,200$  heat units per square foot per hour; and since 600,000 heat units must be supplied to the water, a 53-square foot coil or slightly larger would be required, equal to about 122 ft. of 1 $\frac{1}{2}$ -inch pipe. MODERN BATHROOM SHOWING EXCELLENT ARRANGEMENT OF FIXTURES IN SMALL SPACE Courtesy of the J. L. Mott Iron Works, New York City SANITARY APPLIANCES TRAPS Object of Traps. There are endless varieties of traps marketed, and each shape and type may have some particular advantage for the purpose it is used. Broadly, we can define a trap as a device holding a quantity of water and having an upper portion which dips into the water and forms the seal. The seal should be at least  $\frac{1}{2}$  inches in depth for traps up to 2 inches in diameter and may be 2 $\frac{1}{2}$  inches deep for water closets and the large...

### **From reader reviews:**

#### **John Folsom:**

The guide untitled Carpentry and contracting; a practical reference work on carpentry, building superintendence, etc Volume 4 is the reserve that recommended to you to read. You can see the quality of the reserve content that will be shown to you. The language that publisher use to explained their ideas are easily to understand. The copy writer was did a lot of study when write the book, to ensure the information that they share to you personally is absolutely accurate. You also might get the e-book of Carpentry and contracting; a practical reference work on carpentry, building superintendence, etc Volume 4 from the publisher to make you far more enjoy free time.

#### **Tamara Evans:**

Often the book Carpentry and contracting; a practical reference work on carpentry, building superintendence, etc Volume 4 has a lot associated with on it. So when you check out this book you can get a lot of profit. The book was authored by the very famous author. The author makes some research previous to write this book. This book very easy to read you can get the point easily after perusing this book.

#### **Jennifer Wilson:**

Do you have something that you enjoy such as book? The reserve lovers usually prefer to decide on book like comic, short story and the biggest some may be novel. Now, why not trying Carpentry and contracting; a practical reference work on carpentry, building superintendence, etc Volume 4 that give your enjoyment preference will be satisfied simply by reading this book. Reading practice all over the world can be said as the opportunity for people to know world far better then how they react toward the world. It can't be stated constantly that reading habit only for the geeky man or woman but for all of you who wants to possibly be success person. So , for all you who want to start studying as your good habit, you may pick Carpentry and contracting; a practical reference work on carpentry, building superintendence, etc Volume 4 become your own personal starter.

#### **Heidi Garcia:**

This Carpentry and contracting; a practical reference work on carpentry, building superintendence, etc Volume 4 is completely new way for you who has interest to look for some information given it relief your hunger of information. Getting deeper you upon it getting knowledge more you know or you who still having little digest in reading this Carpentry and contracting; a practical reference work on carpentry, building superintendence, etc Volume 4 can be the light food for you because the information inside this particular book is easy to get simply by anyone. These books produce itself in the form that is reachable by anyone, yeah I mean in the e-book contact form. People who think that in e-book form make them feel drowsy even dizzy this e-book is the answer. So there is not any in reading a publication especially this one. You can find actually looking for. It should be here for you actually. So , don't miss that! Just read this e-book type for

your better life and knowledge.
