Model Building in Mathematical Programming, 4th Edition

H. Paul Williams

Model Building in Mathematical Programming, 4th Edition H. Paul Williams

Review of previous editions 'Such a text - and this is the only one of this type I know of - should be the basis of all instruction in Mathematical Programming.' Journal of the Royal Statistical Society 'An excellent introduction ...for students of business administration and people who want to see the utility of operations research.' European Journal of Operational Research 'It will be appreciated very much by practitioners who already have knowledge in the field of mathematical programming.' Mathematical Programming Society Newsletter Model Building in Mathematical Programming Fourth Edition H. Paul Williams Faculty of Mathematical Studies, University of Southampton, UK This extensively revised fourth edition of this well-known and much praised book contains a great deal of new material. In particular sections and new problems have been added covering Revenue Management, Hydro Electric Generation, Date Envelopment (efficiency) Analysis, Milk Distribution and Collection and Constraint Programming. The book discusses the general principles of model building in mathematical programming and shows how they can be applied by using simplified but practical problems from widely different contexts. Suggested formulations and solutions are given in the latter part of the book together with computational experience to give the reader a feel for the computation difficulty of solving that particular type of model. Aimed at undergraduates, postgraduates, research students and managers, this book illustrates the scope and limitations of mathematical programming, and shows how it can be applied to real situations. By emphasizing the importance of the building and interpretation of models rather than the solution process, the author attempts to fill a gap left by the many works which concentrate on the algorithmic side of the subject.

From reader reviews:

Theresa Gordon:

Reading a publication can be one of a lot of activity that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new information. When you read a book you will get new information since book is one of several ways to share the information or their idea. Second, reading a book will make a person more imaginative. When you looking at a book especially tale fantasy book the author will bring you to imagine the story how the figures do it anything. Third, you could share your knowledge to some others. When you read this Model Building in Mathematical Programming, 4th Edition, you are able to tells your family, friends in addition to soon about yours book. Your knowledge can inspire the mediocre, make them reading a guide.

Raymond Hernandez:

As we know that book is essential thing to add our information for everything. By a reserve we can know everything you want. A book is a range of written, printed, illustrated or blank sheet. Every year ended up being exactly added. This guide Model Building in Mathematical Programming, 4th Edition was filled with regards to science. Spend your spare time to add your knowledge about your research competence. Some people has several feel when they reading the book. If you know how big advantage of a book, you can sense enjoy to read a e-book. In the modern era like right now, many ways to get book that you simply wanted.

Marni Johnson:

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book has been rare? Why so many query for the book? But any kind of people feel that they enjoy intended for reading. Some people likes reading, not only science book but novel and Model Building in Mathematical Programming, 4th Edition or even others sources were given understanding for you. After you know how the great a book, you feel wish to read more and more. Science guide was created for teacher or students especially. Those books are helping them to increase their knowledge. In other case, beside science publication, any other book likes Model Building in Mathematical Programming, 4th Edition to make your spare time considerably more colorful. Many types of book like here.

Sherri King:

As a university student exactly feel bored for you to reading. If their teacher expected them to go to the library or to make summary for some e-book, they are complained. Just tiny students that has reading's heart and soul or real their leisure activity. They just do what the professor want, like asked to the library. They go to there but nothing reading seriously. Any students feel that reading through is not important, boring as well as can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Model Building in Mathematical Programming, 4th Edition can make you truly

feel more interested to read.
