This competitively priced package combines *Mechanics for Engineers: Statics*, 4/e (0-07-004580-1) with *Mechanics for Engineers: Dynamics*, 4/e (0-07-004582-8). These scalar-based introductory engineering mechanics texts, ideally suited for engineering technology programs, provide first-rate treatment of rigid bodies without vector mechanics. The fourth edition provides an extensive selection of new problems and end-of-chapter summaries. The texts bring the careful presentation of content, unmatched levels of accuracy, and attention to detail that have made Beer and Johnston texts the standard for excellence in engineering mechanics education. See the individual text ISBNs above for more information.
