## **Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6)** Alexander V Avakov

Members of the US Congress and others who care about the foundations of power politics in the nuclear age will find facts that speak for themselves in this novel yearbook. This statistical annual presents fundamental data in four sections: (1) Quality of Life, (2) Balance of Power, (3) Developed Market Economies since 1960, and (4) Economic History since 1500. It contains data that is generally not available elsewhere. Sections 1 and 2 give statistics for 230 countries. The World Bank and Encyclopedia Britannica provide statistical data for a maximum of about 160 countries. The actual number of countries in World Bank statistical tables is even smaller. The CIA World Factbook gives data for about 230 countries but that data is limited in scope and is imprecise. Other statistical publications are even less satisfactory. The author has managed to increase the number of countries tallied by writing proprietary software utilizing statistical regressions, selecting data which, first of all, is important and, second, which allows for high correlation coefficients for these regressions. Section 2 includes data about nuclear delivery systems and the number of nuclear warheads of all nuclear powers. This is based on information from reputable sources. Among others, it includes estimates of the Israeli nuclear arsenal which usually do not appear in the press. Official estimates of Russian military expenditures distributed by US and British intelligence communities are methodologically flawed. Such estimates claim to give a picture of military expenditures of the countries of the world at market exchange rates; at the same time, they apparently cite Russian military expense figures at purchasing power parities, thus inflating these numbers in comparison to those of other countries. Such deceptive practices of the Anglo-American intelligence services are counter-balanced by presenting two different tables, showing military expenditures estimates both at market exchange rates and by purchasing power parities. Section 3 gives data on the topic of health care. It seems that public health expenditures as a share of total health expenditures has a stronger correlation with the comparative level (and the rates of improvement) of the main health care indicators than the absolute level (measured as a percent of GDP) of total health expenditures. The data demonstrates that the US has the lowest public health expenditure of developed market economies and is increasingly lagging behind other countries by main health care indicators. The proposed introduction of national health insurance in the US would probably mean some sort of tax increase. The author therefore also seeks to shed light on modern ideological debates about the share of taxation in GDP and its influence on rates of growth. Surprisingly enough, the empirical data for the developed market economies do not seem to support the popular idea that low taxes are strongly correlated with higher rates of growth; depending on how the data are analyzed, the appropriate correlations are either low or even the reverse of what is commonly believed. Section 4 primarily uses data which has become available through the groundbreaking works of Angus Maddison. Using interpolation techniques explained in that section to slightly adjust Maddison's data, the author received numbers for population, GDP per capita, and total GDP for 48 countries for the period since year 1500, figures which seem to be credible and which are not readily available elsewhere.

### **From reader reviews:**

#### **Jamey Ainsworth:**

Reading a book tends to be new life style with this era globalization. With studying you can get a lot of information that will give you benefit in your life. With book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A great deal of author can inspire their reader with their story or perhaps their experience. Not only the storyplot that share in the books. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors on earth always try to improve their ability in writing, they also doing some study before they write with their book. One of them is this Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6).

#### **Bethany Hall:**

Beside that Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6) in your phone, it could possibly give you a way to get nearer to the new knowledge or data. The information and the knowledge you might got here is fresh from the oven so don't be worry if you feel like an outdated people live in narrow community. It is good thing to have Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6) because this book offers to your account readable information. Do you occasionally have book but you seldom get what it's about. Oh come on, that will not happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, such as treasuring beautiful island. So do you still want to miss that? Find this book and read it from today!

#### **Carmela Randle:**

Don't be worry if you are afraid that this book will probably filled the space in your house, you can have it in e-book approach, more simple and reachable. This specific Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6) can give you a lot of friends because by you considering this one book you have matter that they don't and make you actually more like an interesting person. That book can be one of one step for you to get success. This e-book offer you information that perhaps your friend doesn't realize, by knowing more than different make you to be great men and women. So , why hesitate? Let us have Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6).

#### **Agatha Draper:**

As a pupil exactly feel bored for you to reading. If their teacher questioned them to go to the library or even make summary for some e-book, they are complained. Just tiny students that has reading's spirit or real their passion. They just do what the professor want, like asked to the library. They go to generally there but

nothing reading significantly. Any students feel that examining is not important, boring as well as can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Quality of Life, Balance of Power, and Nuclear Weapons (2013): A Statistical Yearbook for Statesmen and Citizens (Volume 6) can make you feel more interested to read.
