Mathematics in Action: An Introduction to Algebraic, Graphical, and Numerical Problem Solving, Books a la Carte Edition (4th Edition) Consortium for Foundation Mathematics

This edition features the exact same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value—this format costs significantly less than a new textbook.

The second book of a three-part series, *An Introduction to Algebraic, Graphical, and Numerical Problem Solving, Fourth Edition* illustrates how mathematics arises naturally from everyday situations through updated and revised real-life activities and the accompanying practice exercises. Along with the activities and the exercises within the text, MathXL® and MyMathLab® have been enhanced to create a better overall learning experience for the reader. Technology integrated throughout the text helps readers interpret real-life data algebraically, numerically, symbolically, and graphically. The active style of this book develops readers' mathematical literacy and builds a solid foundation for future study in mathematics and other disciplines.
