Incidents of piracy doubled in number from 2008 to 2009, highlighting the need for stronger measures to combat the problem. At the same time, the threat from terrorist actions in the maritime environment also represents an increasingly worrying trend. This book presents the proceedings of the NATO Centre of Excellence Defence Against Terrorism (COE-DAT) Advanced Research Workshop, entitled Maritime Security and Defence Against Terrorism, held in Ankara, Turkey, in November 2010. The workshop consisted of four sessions: threats in the maritime environment; vulnerabilities and sensitivities of maritime security; combating the threats to maritime security and maritime terrorism; and lastly, Turkey's contribution to global maritime security. Each of the presentations was followed by a debate, with the 10 experts from five countries joining the group of international participants to discuss the issues raised together; the aim of the workshop being to facilitate awareness of the issues in NATO and affiliated countries. Representing a significant contribution to finding the way forward in maritime security, this book will be of interest to all those whose work involves them in countering piracy and the terrorist threat in the maritime environment.
