Marker-Assisted Plant Breeding: Principles and Practices B.D. Singh, A.K. Singh

Marker-assisted plant breeding involves the application of molecular marker techniques and statistical and bioinformatics tools to achieve plant breeding objectives in a cost-effective and time-efficient manner. This book is intended for beginners in the field who have little or no prior exposure to molecular markers and their applications, but who do have a basic knowledge of genetics and plant breeding, and some exposure to molecular biology. An attempt has been made to provide sufficient basic information in an easy-to-follow format, and also to discuss current issues and developments so as to offer comprehensive coverage of the subject matter. The book will also be useful for breeders and research workers, as it offers a broad range of up-to-the-year information, including aspects like the development of different molecular markers and their various applications. In the first chapter, the field of marker-assisted plant breeding is introduced and placed in the proper perspective in relation to plant breeding. The next three chapters describe the various molecular marker systems, while mapping populations and mapping procedures including high-throughput genotyping are discussed in the subsequent five chapters. Four chapters are devoted to various applications of markers, e.g. marker-assisted selection, genomic selection, diversity analysis, finger printing and positional cloning. In closing, the last two chapters provide information on relevant bioinformatics tools and the rapidly evolving field of phenomics.

From reader reviews:

Frank Johnson:

Spent a free a chance to be fun activity to try and do! A lot of people spent their spare time with their family, or their own friends. Usually they accomplishing activity like watching television, gonna beach, or picnic within the park. They actually doing same every week. Do you feel it? Will you something different to fill your own personal free time/ holiday? Might be reading a book may be option to fill your free time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to test look for book, may be the guide untitled Marker-Assisted Plant Breeding: Principles and Practices can be fine book to read. May be it might be best activity to you.

Carolyn Lutz:

Typically the book Marker-Assisted Plant Breeding: Principles and Practices has a lot of information on it. So when you read this book you can get a lot of help. The book was compiled by the very famous author. The writer makes some research previous to write this book. This particular book very easy to read you can obtain the point easily after reading this article book.

Jennifer Wilson:

The book untitled Marker-Assisted Plant Breeding: Principles and Practices contain a lot of information on the item. The writer explains your ex idea with easy method. The language is very simple to implement all the people, so do not really worry, you can easy to read this. The book was written by famous author. The author will take you in the new era of literary works. You can read this book because you can keep reading your smart phone, or gadget, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can open up their official web-site in addition to order it. Have a nice read.

Robert Caldwell:

That book can make you to feel relax. This book Marker-Assisted Plant Breeding: Principles and Practices was multi-colored and of course has pictures around. As we know that book Marker-Assisted Plant Breeding: Principles and Practices has many kinds or genre. Start from kids until young adults. For example Naruto or Private eye Conan you can read and believe you are the character on there. So , not at all of book are make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading in which.
