## Body Language: Advanced Body Language Guide to Master Body Language in 24 Hours (body language, body language secrets, body language attraction) Joan Hunter

Body language can help a person define the real emotion behind spoken or unspoken words. Adults can simply, and properly, know if a kid is frightened by the thunder if they see the kid shaking and covering their ears with their hands. However, there are wrong ideas about reading body language that can lead to miscommunication, except if the language shown by the entire body is read.

Our eyes are known to be the windows to our soul and it must be this idea that formed the biggest myth about reading body language. It's commonly thought that when someone avoids, or doesn't keep an eye contact, chances are, that person is lying. Though commonly understood, it's a false impression. People that lie often can actually keep long eye contact as they are aware that a lot of people think looking away from eye contact indicates a lie. Some people that are not lying may not maintain eye contact because they're just telling a fact, and they don't feel like they don't have anything to prove.

The whole body language that is used has to be monitored on top of the eye gesture. Fiddling, tapping fingers, or running finger through the hair with little to no eye contact means that the person is not comfortable with the surrounding or with the topic being discussed, yet eyes contact on a distant place by someone crossing his arm indicates seriousness or being attentive to the person he was talking to. Correctly body language reading can provide a person vision into the feelings, thoughts, and emotions of someone. In order to read precisely, though, you have to keep in mind that seeing the language or movements of the whole body instead of looking at every single part of the body is different from reading the other parts.

This book will help you to accurately learn how to read body language within 24 hours.
